Report Services

At Family Voice Peterborough (FVP) we conduct an annual audit of settings SEN Information reports, and over the last five years we have witnessed an improvement in the way that schools seek to support children with SEND.

However, parents are frequently reporting that they feel unsupported, with this in mind how can schools address this?

One way is through how settings communicate their support on their websites, such as through the SEN Information Reports and SEN policies.

We have found that this is an area where some settings seem to be struggling and could benefit from some guidance & support.

At FVP we understand the pressures that settings are under to deliver services in an increasingly difficult economic environment.

As an organisation part of our ethos is to seek to help empower professionals to continue to do the good work they are doing and being able to deliver best practice to our children with SEND.

Our Support

As part of our package our parent representatives will meet with your settings SENCO and review your current SEN Information report and advise on areas that could benefit from improvement.

We advise on content to ensure your setting is compliant with the SEN Code of Practice and the Children's and Families Act 2014 and help schools to showcase the dedication, enthusiasm and innovation that is taking place in their settings for children with SEND.

When this service is used in conjunction with our training packages we will work together to promote co-production between parent carers and to settings ensure going forward this is a sustainable model.

Hours & Time

We will provide 20 hours dedicated to working with your setting and parents on reviewing, analysing and updating your SEN Information Report and other SEND information as required.

We will also allocate further parent rep time as required to facilitate parent carer co-production in this process.

We can discuss how this will work in practise to meet the individuals needs of your setting
